

Journey to your best program

Challenge 0

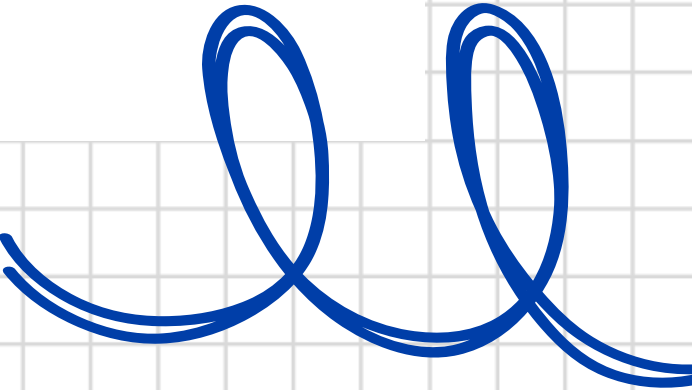

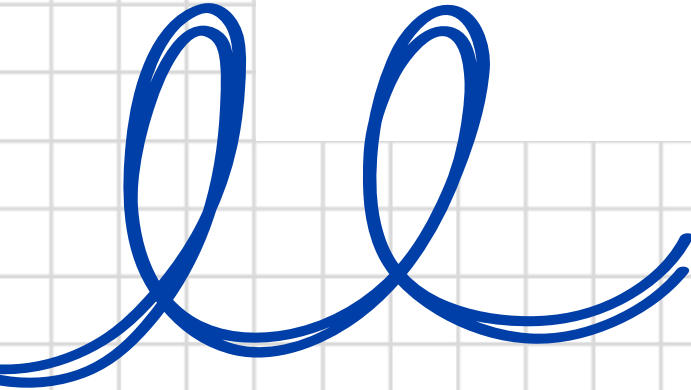

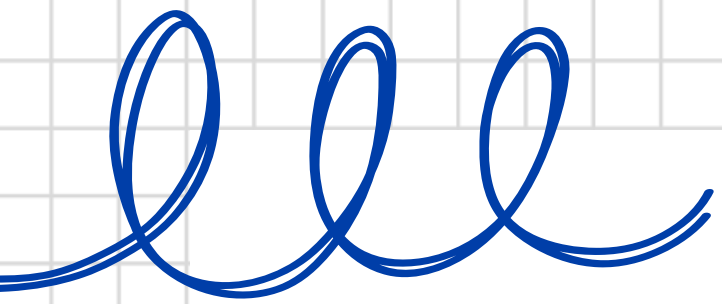

Thank you

First of all, I would like to thank Mr. Dao Vo for opening a virtual internship program called Journey to your best program. And thank you to those who have gone before and accompanied the program for creating a program for our students to improve their knowledge and skills for the future.

Introduce yourself

My name:

Tran Trong Phu

Age: 23

Working:

Information technology student majoring
in software technology

Phone number: 0931754728

email:

trantrongphuqn123@gmail.com

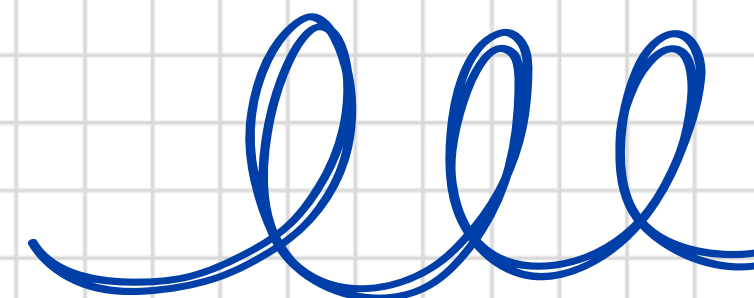

Table of contents

1. What's Topdown approach?
2. How to apply topdown solution to the program?
3. How to learn and learn fast?
4. Autonomy at work?
5. What's the smart question? how to apply it on your daily basis/work?

1. What's Topdown approach?

What's?

- This method is understood from the general view to the internal details of a certain problem or event.
- Specific example: The dining table has table legs, a table top and decorative patterns, and the table legs are high enough to sit and eat.

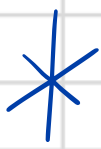

Advantage:

- Clearly define goals without losing direction.
- Easily manage work from management level.
- Deploy and complete faster.
- Easily identify the source of the problem.

2. How to apply topdown solution to the program?

Target	Implementation tasks	Problem solving	Project (design system)
<ul style="list-style-type: none">• From big goals divided into small goals.• From the goal we come up with tasks to achieve that goals.	<ul style="list-style-type: none">• Evaluate the importance of the task.• Perform important tasks in advance that contribute positively to the project.	<ul style="list-style-type: none">• Find the source of the problem.• Evaluate the impact of problems encountered in the project.• Search for available solutions to solve the problem.• Build optimal and streamlined solutions.• How to think and look at the problem is an important part.	<ul style="list-style-type: none">• Come up with an idea for a product that solves a problem and brings value to the community.• Leaders' decisions, ideas, budgets, human resources and plans.• Assess project risks in terms of finance, human resources and time.• Start building and creating products with a plan.

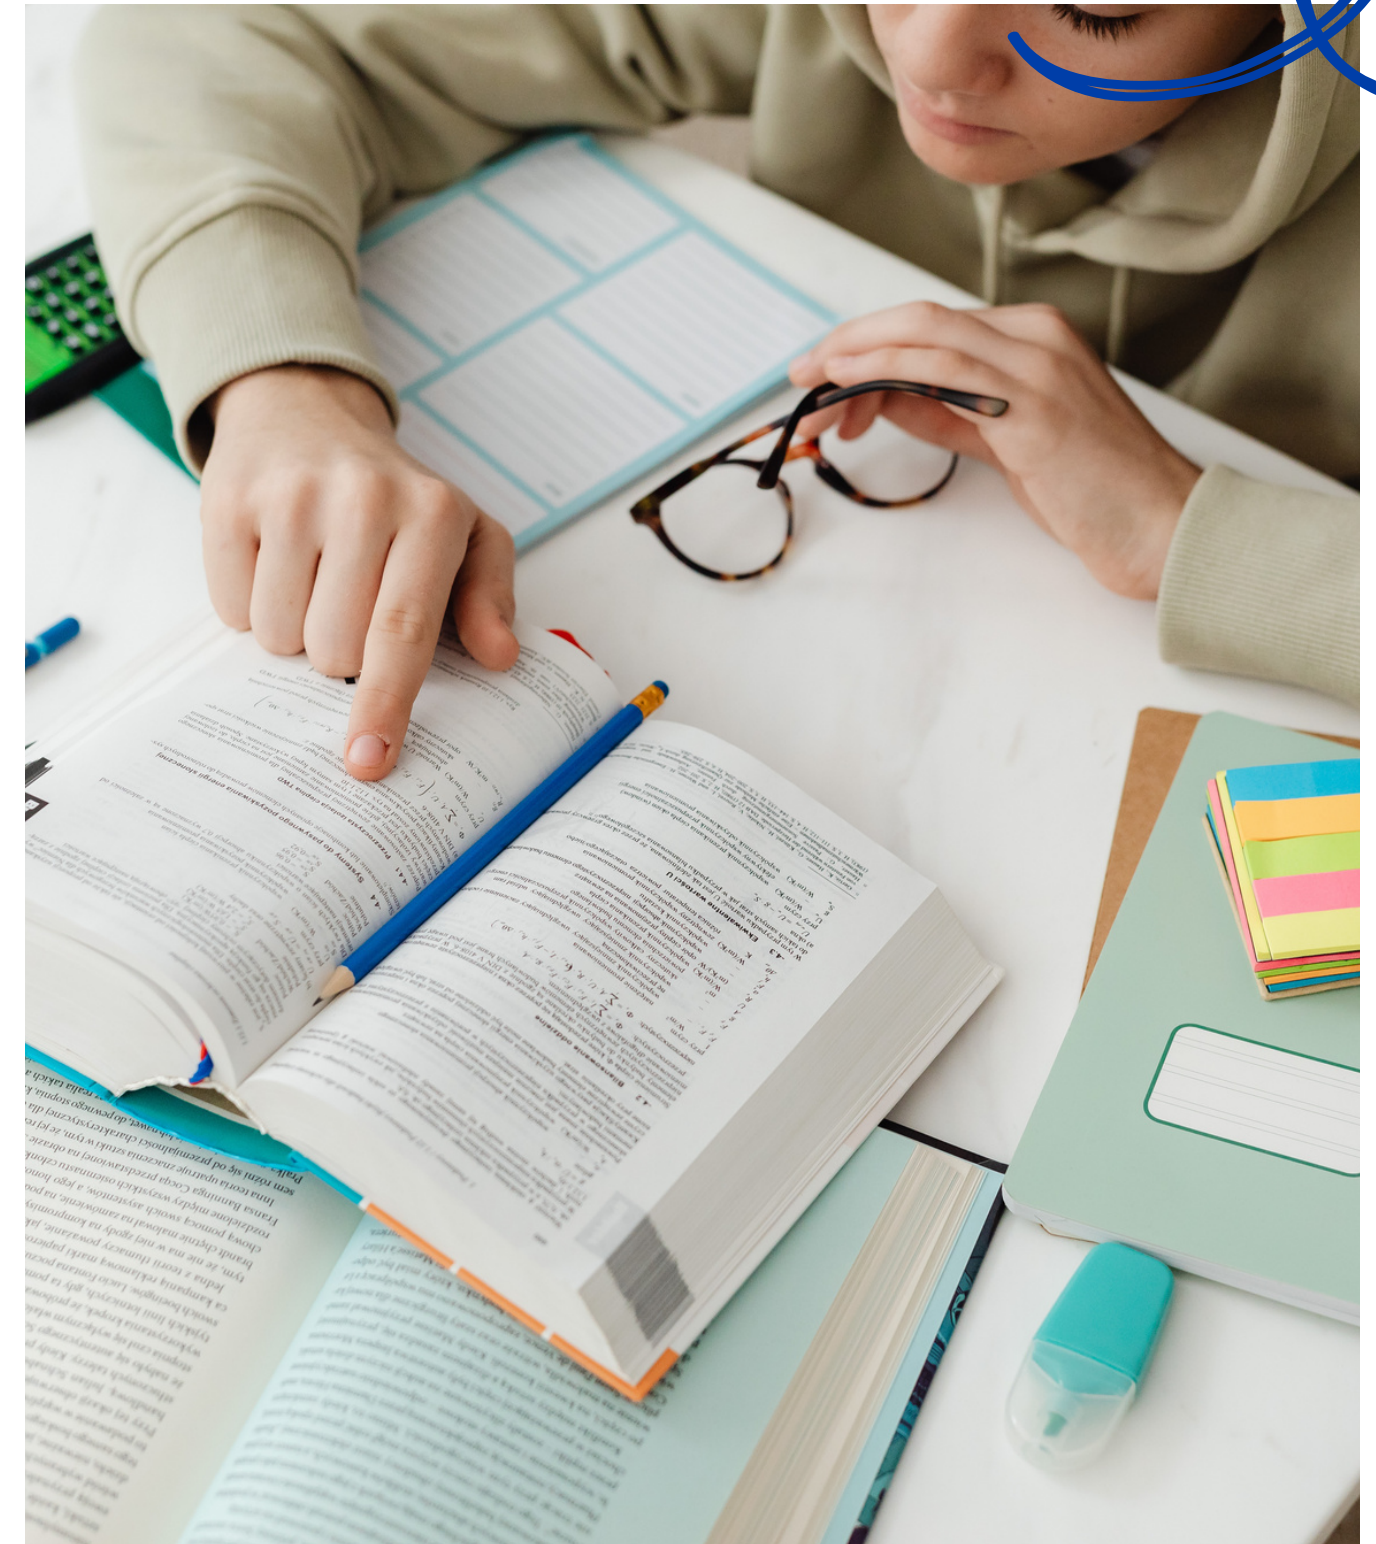

3. How to learn and learn fast?

How to learn?

- It is the exploration and learning of knowledge that can solve a problem and create tangible or intangible value for the human community.
- How to learn and receive information from many different sources: books, the internet, and communication between people to improve your living capital.

How to learn fast?

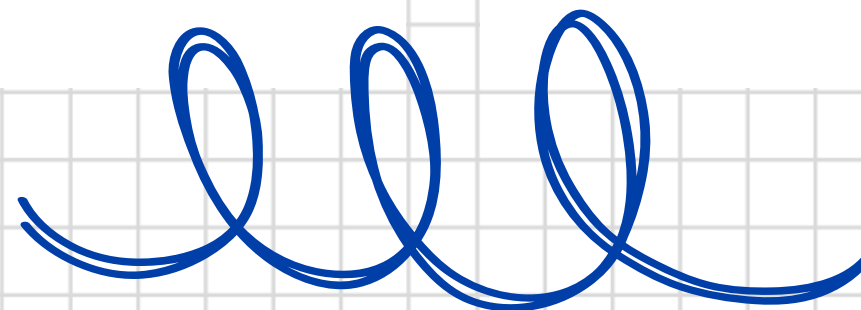

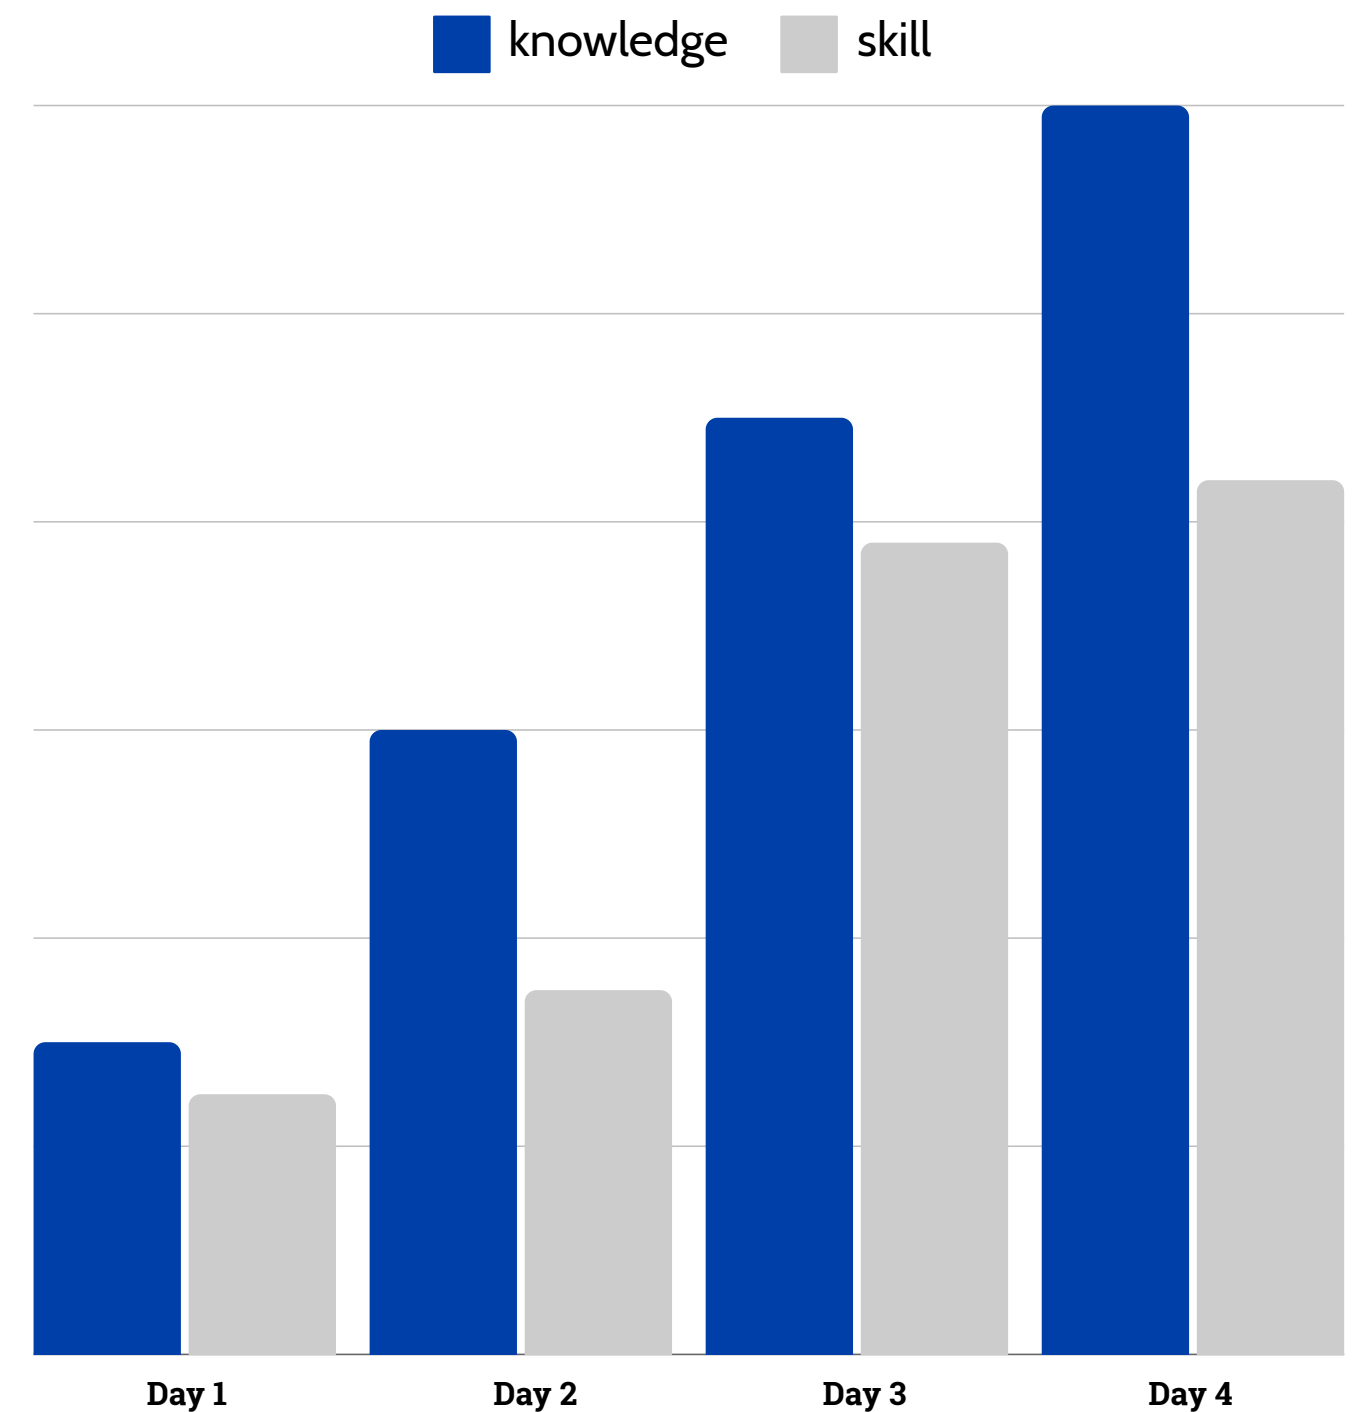

- Learn concepts .
- Ask yourself questions surrounding the issue you are researching.
- Try to ask questions from multiple angles.
- Apply in practice.
- Share knowledge stories with everyone.

4. Autonomy at work?

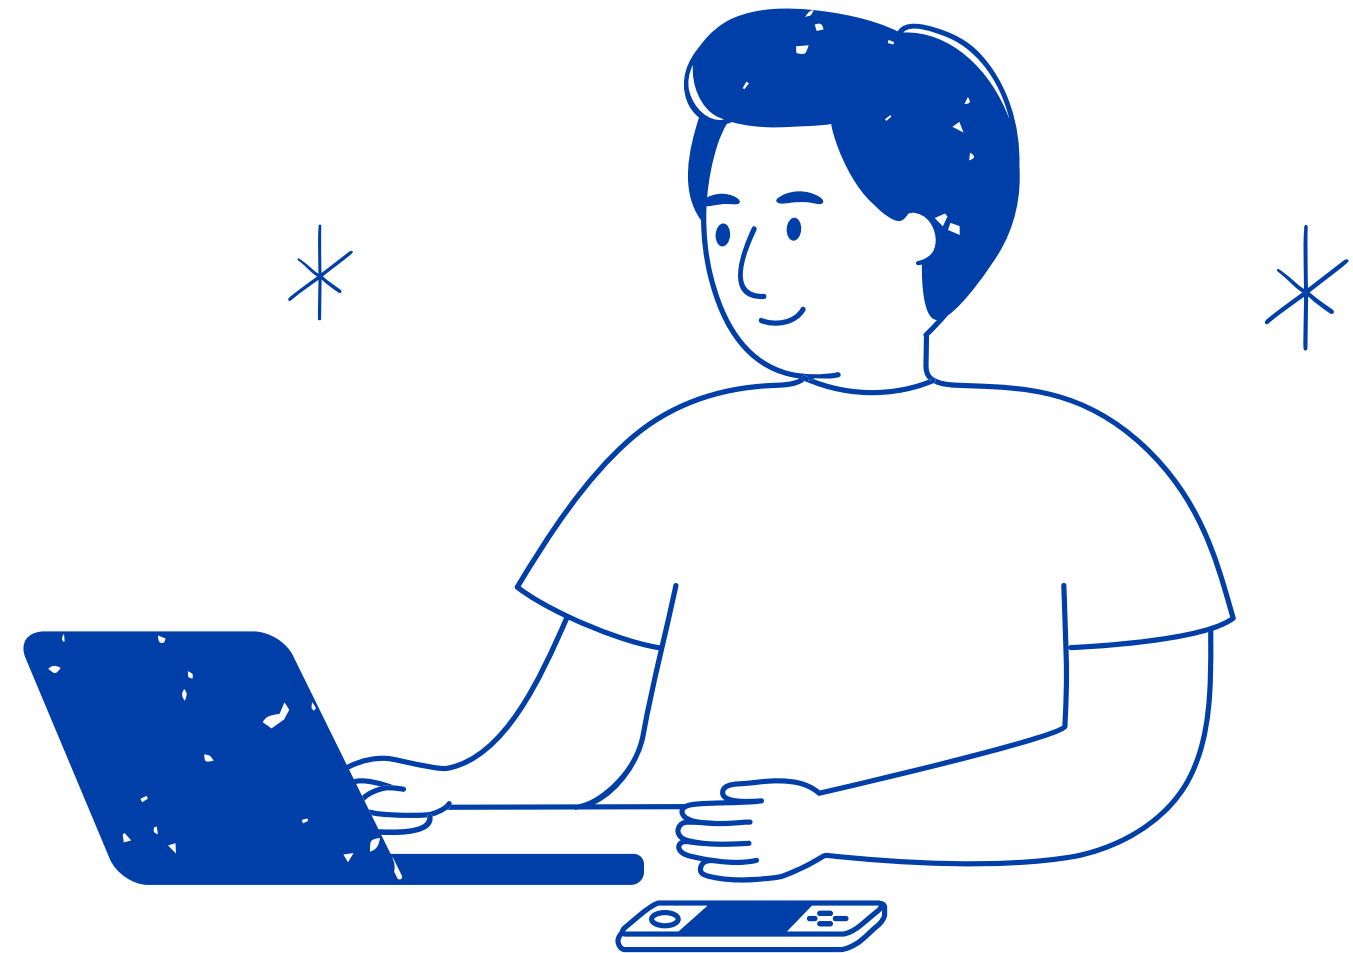

- Autonomy in work belongs to consciousness, if you want to do it, if you don't want to then don't it. So think positively and you will receive the value of everyone's knowledge, experience and understanding. Completing your work well and proactively supporting your colleagues around you will automatically improve your capabilities.

yourself

5. What's the smart question?

- Open-ended questions tend to be analytical. For example: why?, what is it?, What is inside it?
- Apply prior knowledge, compare answers and ask questions.
- Ask polite questions and be willing to piece together interesting stories.
- Discuss together in a positive way to improve knowledge.

How to apply smart question on your daily basis/work?

Always ask yourself questions and learn

- Ask why others do that?
- How does that work?
- What creates it?

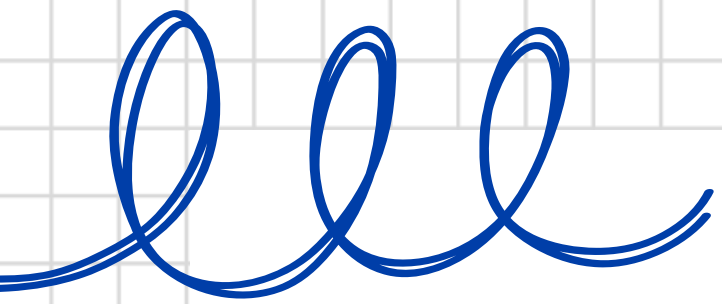

List difficult questions to ask seniors and predecessors

- There are some issues that you may not understand deeply due to lack of experience and knowledge, please list those questions and ask for help.

Talk openly and learn

- Polite, open with a spirit of learning, discussing topics of knowledge and experience
